SSC

- Percentage : 85

Technologies

Languages: C++, C, Python, SQL

Technologies: MySQL Server, VSCode, Flask, FastAPI, Git

Projects

Movie Recommendation System

[Link](#) 

- Made an End-to-End Movie Recommendation System using the Streamlit Web Framework of Python on TMDB Dataset of 5000 Movies available on Kaggle
- Leveraged CountVectorizer to vectorize the texts to perform Natural Language Processing.
- Using Cosine Similarity found the Top 5 movies similar to what the user has demanded
- Integrated TMBD API to fetch the movie title and movie poster

Text to SQL App

[Link](#) 

- Web app to translate natural language to SQL Query
- Leveraged SQLite to create a database of students in Python and created a LLM app by using Gemini Pro API
- Natural Language is translated to SQL Query using the LLM app and the corresponding data is retrieved from the student's database

EDA on Zomato Dataset

[Link](#) 

- Performed data analysis on Zomato Dataset to gain insights from the dataset that can be used to facilitate business purposes
- Merged two datasets (Zomato.csv Country-Code.xlsx) and found out which country orders the most from Zomato, interpreted the ratings given by customers, found out which country has the facility of online delivery

URL Shortener

[Link](#) 

- A Web app to shorten the long URLs using Flask and HTML
- Long URLs are mapped to short URLs and stored in a JSON file.
